LANDSCAPING AND FORESTRY

on Pleasant Street Framingham Centre Massachusetts

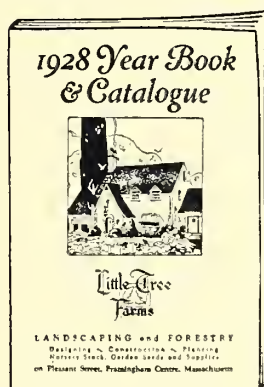

SPRING is just around the corner! No matter how wintry the landscape nor what the thermometer at the dining room window may say, each day the sun grows a little stronger and under the snow the old Earth makes ready to burst forth into bloom again the moment winter relaxes his icy grip.

It's time to think of planting—and in recognition of this fact as well as to stimulate early orders, Little-Tree Farms presents these choice selections of decorative Evergreens, Flowering Shrubs, Shade Trees and Vines at the very attractive prices listed.

In addition we offer an even more attractive discount of 10 per cent on all orders for plants listed herein if accompanied by cash and received on or before March 31, 1928. Here is your big Pre-Season Opportunity to buy nursery stock of tip top quality at considerably below usual prices.

Note especially the big sizes offered in evergreens, now so difficult to get elsewhere. At the prices quoted they represent especially good value and will save you years of waiting.

Whether you buy from this Special Offer bulletin or not be sure to send for the Little-Tree Farms

1928 Year Book and Catalog

which is now ready for you and will be mailed free to you on request. It's a big, beautiful book full of varieties of Evergreens, Flowering Shrubs, Shade Trees, Perennials, Roses, Iris, Peonies, etc., and even fuller of stimulating ideas.

Also many intriguing novelties in Grass and Flower Seeds, Tools, Sprays, Fertilizers, Garden Furniture, Books and Supplies—in short—**EVERYTHING FOR THE GARDEN** and all of standard Little-Tree Quality, which means the best possible value at the lowest possible price.

Norway Spruce is a popular evergreen, whose foliage is dense, dark green and graceful. Its very rapid growing habit makes it especially valuable for hedges, screen plantings, quick-growing timber crops or Christmas trees and as a lawn specimen.

*Note: By "SEVERAL TIMES TRANSPLANTED" (Specimen quality for all ornamental uses) we mean a seedling plant that has been dug up, root pruned and top pruned, and planted in fresh soil at several successive intervals of two or more years. ONCE and TWICE TRANSPLANTED plants are younger in this process of development. They are very valuable for nursery and mass planting and for reforestation.

B & B means Balled and Burlapped (roots in a ball of native loam securely wrapped and tied in burlap) as illustrated in these pictures.
